Information Communication Technology (CSC101)

Lab 02

Topic: Introduction to Power Point

E-mail: mariamsherwani434@gmail.com

Objective

In this lab the students will be able to combine text, graphics, and pre-designed backgrounds to create professional presentations.

Activity Outcomes

The students will be able to:

- ✓ Prepare a professional presentation.
- ✓ Add animations and sounds to the slides.

Instructor Note

As a pre-lab activity, read the Microsoft official site for detailed guidance.

1) Useful Concepts

MS PowerPoint is a program included in the Microsoft Office suite. It is used to create presentations for personal and professional purposes.

In this manual, the functions and features of a PowerPoint presentation are discussed.

Elements that can be added to a PowerPoint slide:

- Clip Art
- Graphs
- Tables
- Photographs
- Charts

- Media Clips
- Videos

2) Solved Lab Activities

Activity 1: Making Presentation Slides

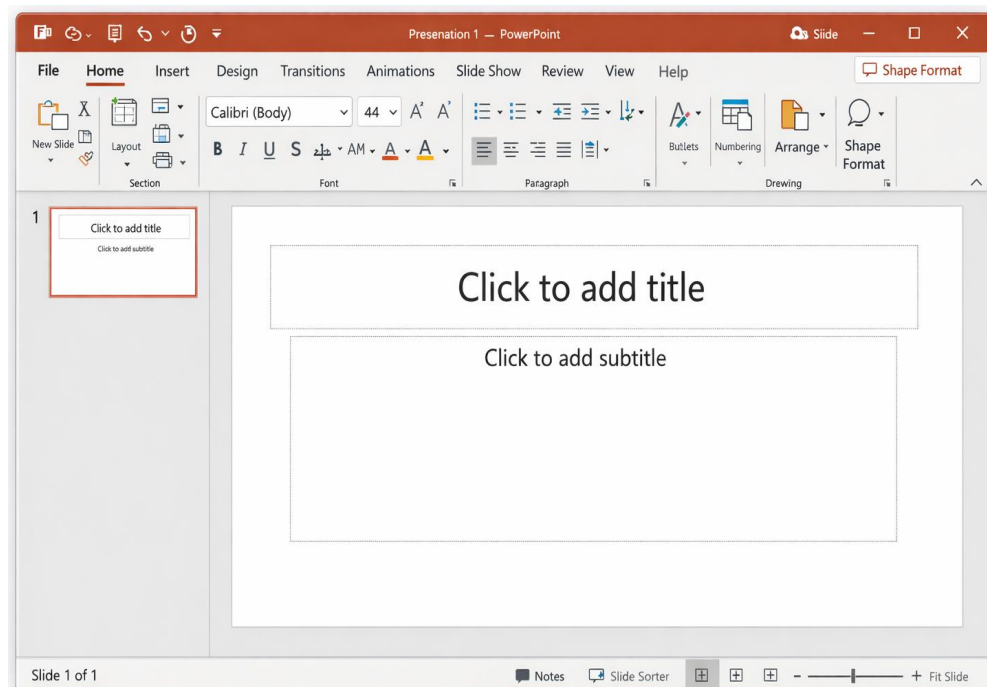

Slides in a presentation are similar to pages in a word processing document. All slides and graphics are saved in one file.

PowerPoint files can be used in the following ways:

- On-screen slide show displayed on a monitor or projector.
- Web pages published on the internet.
- Overhead transparencies printed on transparency sheets.
- Handouts printed with multiple slides per page.

Create Slide Presentation

When PowerPoint is launched, the Presentation window appears.

You can start a presentation using:

- ✓ Blank presentation
- ✓ Design themes
- ✓ Templates from Microsoft Office.

This lab focuses on using a Design Theme.

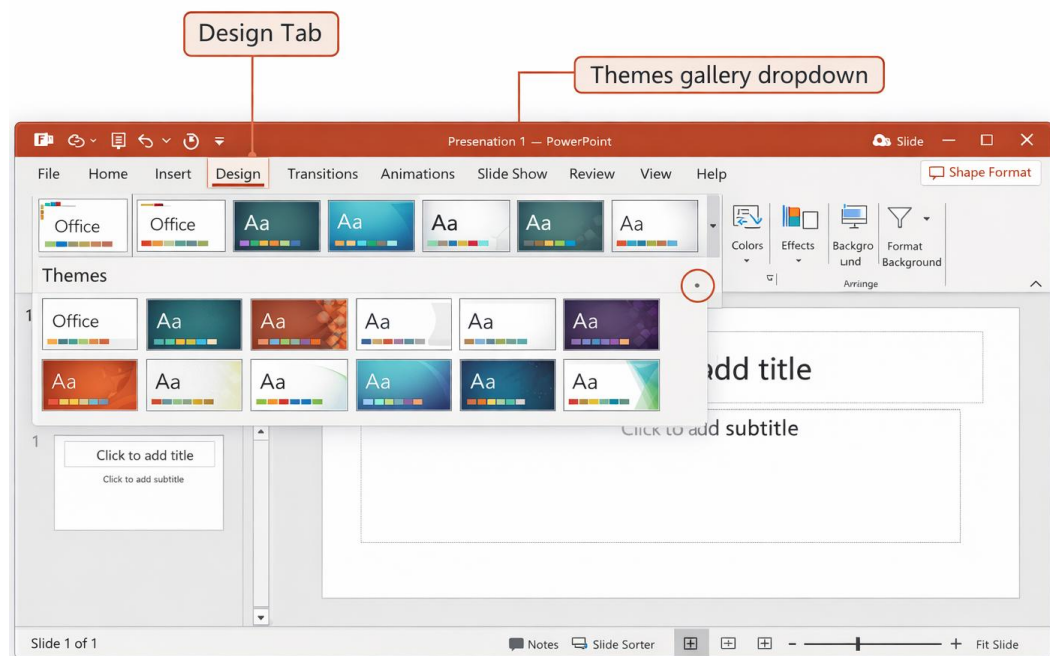

A. Design Theme

A theme provides a consistent appearance throughout the presentation. It includes color schemes, fonts, and layouts.

Steps to apply a theme:

1. Select the Design tab
2. Click the Themes drop-down arrow
3. Preview available themes
4. Select a theme

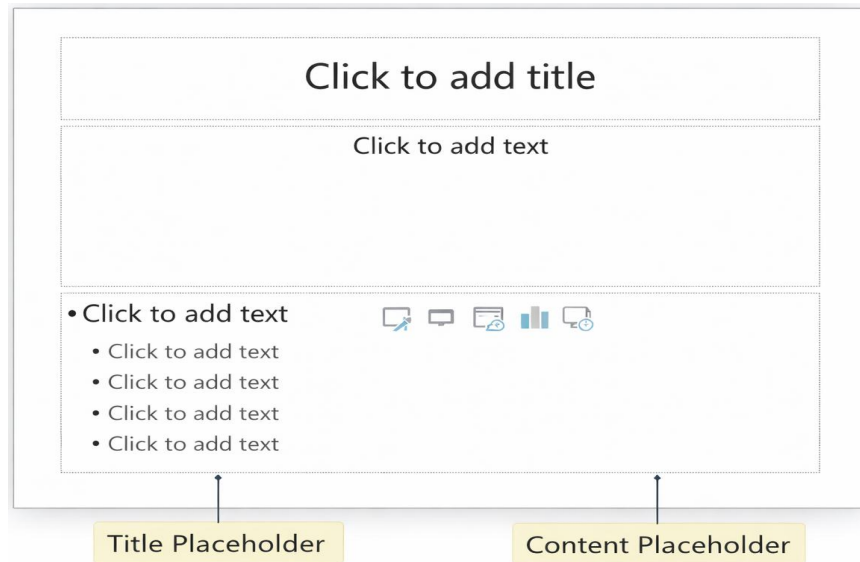

Note: A theme can be changed at any time.

B. Add Text

PowerPoint uses placeholders to contain text and graphics.

- Click inside a placeholder to type text
- Placeholders appear as dotted boxes
- They do not appear in the final presentation

Save Presentation

File → Save As → Enter file name → Save

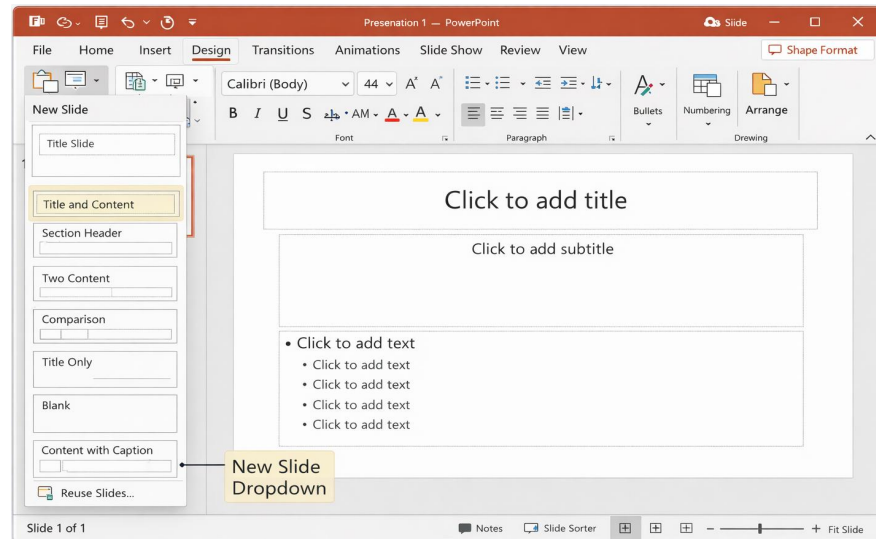

Add New Slide

A slide layout determines the placement of content.

Steps to add a slide:

1. Home tab → New Slide
2. Select a layout
3. Enter title and content

Common layouts: - Title and Content - Two Content

Activity 2: Editing Techniques

A. View Modes for Editing

PowerPoint provides different views to create and manage presentations.

Normal View

- Main editing view.
- Displays slide thumbnails, current slide, and notes.

Slide Sorter View

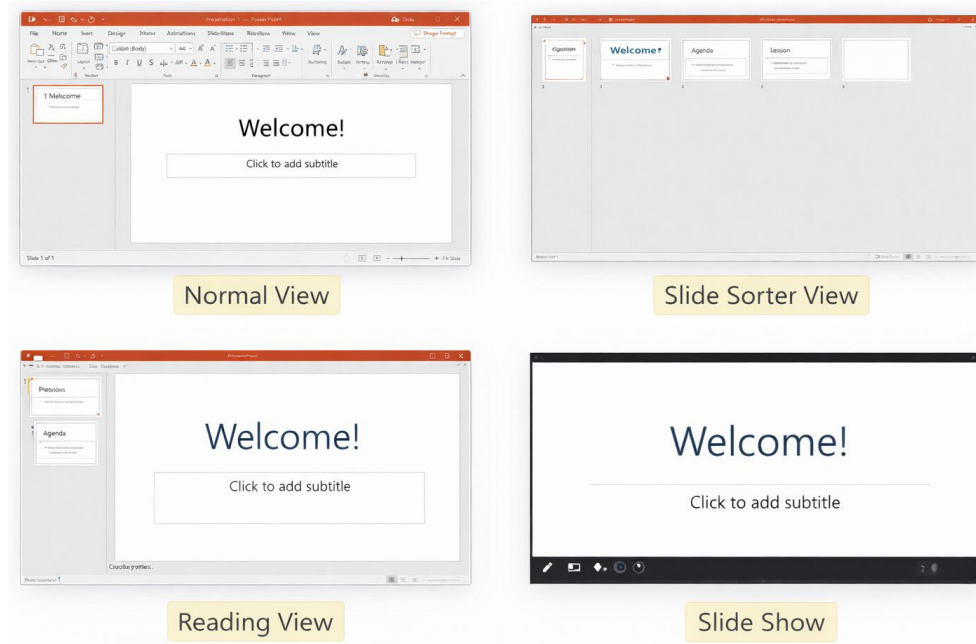

- Displays slides as thumbnails.
- Used to reorder, add, or delete slides.

Reading View

- Displays slides in full screen with PowerPoint interface visible.

Slide Show View

- Displays presentation in full screen for audience viewing.

B. Edit Bulleted List

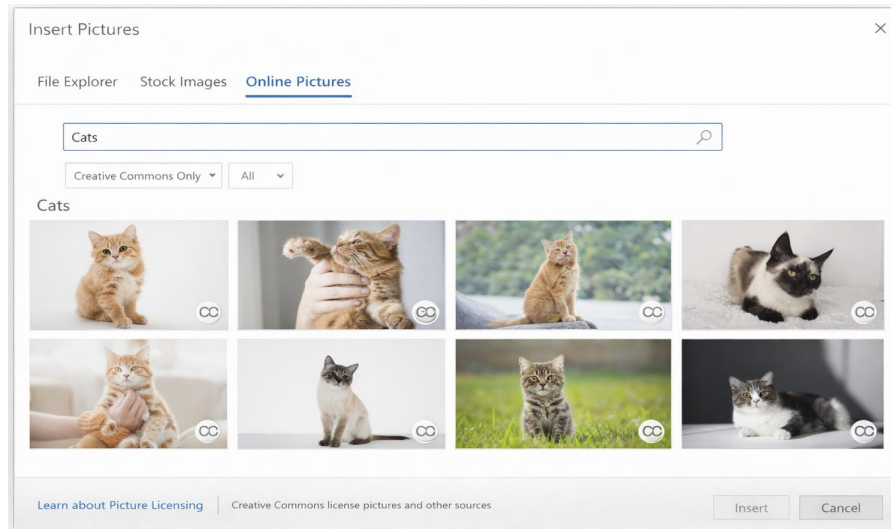

- Press Enter to create a new bullet.
- Press Tab to create a sub-bullet.
- Press Shift + Tab to return to the previous level.
- Use Increase Indent to create sub-bullets.

C. Add Pictures

Pictures enhance the visual appeal of a presentation.

Steps to insert an online picture:

1. Select the slide
2. Click Online Pictures
3. Search for an image
4. Select and insert the image

2) Graded Lab Tasks

3) Lab Task 1

Create a 15-slide presentation on Input and Output Devices.

Requirements:

- ✓ Use animations and transitions
- ✓ Apply a custom Slide Master
- ✓ Maintain formal presentation style
- ✓ Use appropriate fonts, colors, and formatting
