

Name :

Laiba Mudassar

Roll No :

SP26-BCS-021

Course:

ICT (Theory)

Assignment:

Theory (2)

Submitted to:

Mam Mariam

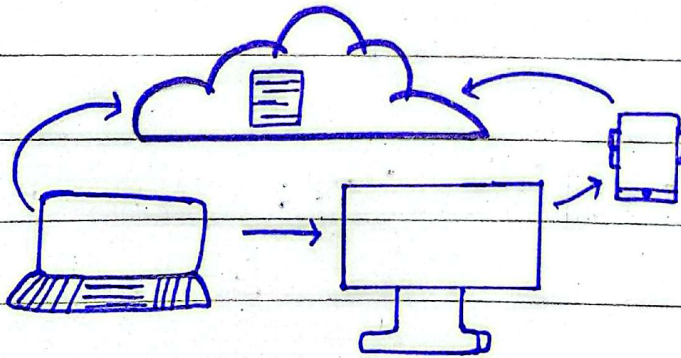

Comsat University, Vehari.

Emerging ICT Domains

Cloud Computing:

Cloud computing allow users to store and access data online rather than local harddrive. This ensures files are accessible from any location with an internet connection.

Example: Microsoft oneDrive allow users to sync photos and file across multiple devices.

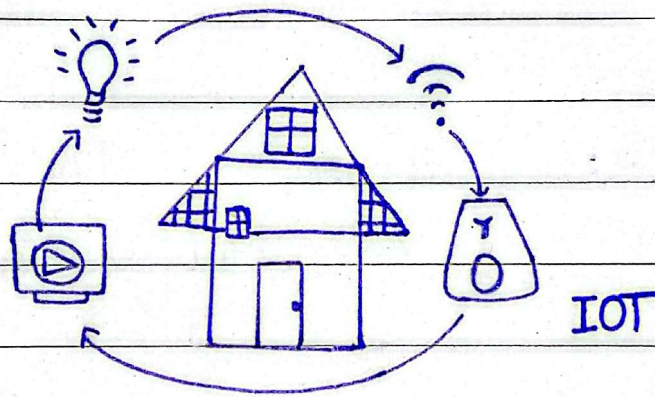

Internet of things:

A concept of physical objects embedded with sensors and software to connect and exchange data with

other devices on internet. These devices also controlled remotely and also connected to internet.

Examples:

Smart home devices like thermostats and smart lights etc.

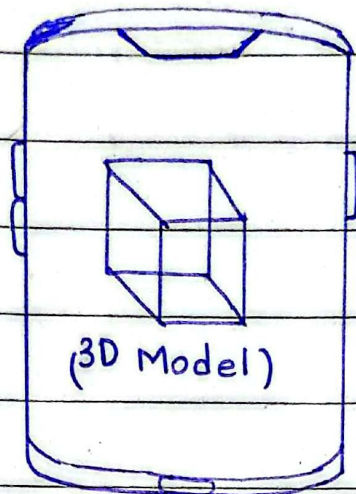

Augmented Reality:

Augmented technology works by overlaying information onto the real world. Unlike virtual reality it does not create a new environment but enhances the one you are currently in.

Example:

AR games (Pokemon GO)
and AR tools for 3D modeling.

Artificial Intelligence:

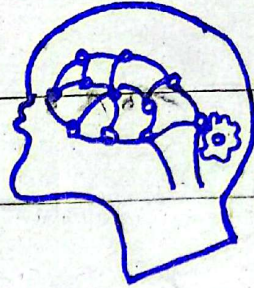

Artificial intelligence refers to the development of machines that can think or learn by processing vast amount of data to perform tasks that typically require human intelligence.

Example:

Like chatbots (Gemini) and (chatGPT).

Day: _____

Date: _____

Artificial
intelligence.
